DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it appears a typo "5" is present on line 3. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claim 10 is objected to because of the following informalities: There appears to be a typo on line 2, "15". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4, 5, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi (US PAT 6,268,004).

See the attached marked up drawing figure 2 of Hayashi depicting the claimed features.

5. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyce (US PAT 3,462,001).

See the attached marked up drawing figure 1 of Boyce depicting the claimed features.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi.

Hayashi teaches the claimed features except for the food crimper of claim 6. Hayashi instead teaches a dough hopper. It would have been an obvious matter of design choice as to the type of upstream process being utilized by the positioning device, since the meat products and their crimping is not positively recited as part of the invention claimed by the applicant in the apparatus claims. The mere selection of a particular known process would be an obvious design choice and the selection of any known food handling device would be well within the level of ordinary skill in the art.
